

Open Position:

LignoTech USA in Rothschild Wisconsin welcomes candidates to apply for the position of Research Associate with focus on lead acid battery technology. The position requires an advanced degree (Master's, PhD) in a relevant science area. Duties and responsibilities include the design, assembly and testing of prototype lead acid cells; the design and preparation of novel organic compounds, and participation in development projects pertaining to other core LignoTech applications. A working knowledge of lead acid battery technology and test protocols is a priority. Familiarity with DOE, analytical methods and application test methods is desirable.

The position requires good communication skills as the candidate will interface with global sales, technical, and manufacturing colleagues and customers. The successful candidate will possess a high degree of initiative and drive and be comfortable working in a cross-cultural and international environment.

LignoTech USA is a part of Borregaard AS, an international company with strong global positions in wood-based chemicals and other selected niches of organic chemicals including the recognized global leader in organic expander additives for lead acid batteries. The Company develops and supplies Specialty Chemicals, Fine Chemicals, and Ingredients for a wide range of applications. Borregaard has production plants and sales offices in America, Europe, Asia and Africa. Borregaard has over 1,000 employees and sales of about \$700 million.
